

## THE HEATHER SOCIETY

acting as

INTERNATIONAL CULTIVAR REGISTRATION AUTHORITY

certifies that

*Calluna vulgaris* 'Kuliss'

– a fantasy name –  
has been registered by

**STEN-BÖRJE SÖRENSON,**  
Almvägen 7, 475 51 Hönö, Sweden.

REGISTRAR

DATE **26 October 2015**  
on behalf of The Heather Society

Its characteristics at the time of registration were

Flowers lavender (H3) with crimson (H13), single, September–November.  
New shoots pink and cream, turning greyish green in summer, foliage and shoots with prominent tomentum of long, somewhat shaggy hairs; stem appearing white.  
Habit upright, bushy; after 5 years to 50cm tall, and 50cm across.

Selected clone from seedlings raised from open-pollinated plant of 'Tallboy',  
possibly pollinated by 'Kerstin'.

"It looks like a vigorous mixture of the two presumed parents."

**Cultivar registration number: C.2015:07**
